Performance data quoted represents past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance of the fund may be lower or higher than the performance quoted. Performance data current to the most recent month end may be obtained by calling (866) 811 0224, or visiting [www.hodgesfunds.com](http://www.hodgesfunds.com) for quarterly performance. The fund imposes a 1.00% redemption fee on shares held less than 30 days. Performance data does not reflect the redemption fee. If reflected, total return would be reduced. Gross performance doesn't reflect fees or expenses; if reflected, returns would be reduced.

<sup>3</sup>Sector weights and Fund holdings are subject to change at any time and are not recommendations to buy or sell securities.

Cash Flow is the net amount of cash and cash equivalents moving into and out of a business. Price/Book is calculated by dividing the price of a company's stock by its book value. Price/Cash Flow is calculated by dividing the price of company's stock by its cash flow.

**Concentrating assets in fewer individual holdings can expose the fund to more volatility than a diversified fund.**

*The fund's investment objectives, risks, charges and expenses must be considered carefully before investing. The prospectus contains this and other important information about the Hodges Blue Chip Equity Income Fund, and it may be obtained by calling (866) 811 0224, or visiting [www.hodgesfunds.com](http://www.hodgesfunds.com). Read it carefully before investing.*

Mutual fund investing involves risk. Principal loss is possible. The Fund invests in foreign securities which involves greater volatility and political, economic and currency risks and differences in accounting methods. The use of options and future contracts have special risks such as unlimited losses of the underlying holdings due to unanticipated market movements and failure to correctly predict the direction of securities prices, interest rates, and currency exchange rates. Investments in debt securities typically decrease in value when interest rates rise. This risk is usually greater for longer-term debt securities. The Fund may also make short sales of securities, which involves the risk that losses may exceed the original amount invested. Hodges Capital Management (HCM) is the adviser to the Hodges Funds, which are distributed by Quasar Distributors, LLC.

Shareholders should refer to the summary prospectus dated July 29, 2022, for specific details related to the reduction of fees.

**Past performance is no guarantee of future results.**

The Russell 1000<sup>®</sup> is a subset of the Russell 3000<sup>®</sup> Index. It represents the top 1000 companies by market capitalization. It is not possible to invest directly in an index.
