Investment Approach

Bottom Up, Fundamental

Investment Goal

The Hodges Small Intrinsic Value Fund invests in companies that have an attractive market price relative to underlying asset value, earnings power or the potential for a turnaround in business fundamentals. We also seek companies with mispriced or misunderstood deep, intrinsic value but lacking a near term catalyst to unlock that value, which may require a longer time horizon.

Performance (%) quarter ending 9/30/18

	Quarter	Year to date	Annualized			
			1 Year	3 Year	5 Year	Since Incep.
Hodges Small Intrinsic Value (gross)	0.88	4.97	8.75	12.12	NA	10.30
Hodges Small Intrinsic Value (net)	0.56	3.96	7.35	10.69	NA	8.89

Annual Year-End Returns (%)

	2017	2016	2015	2014	2013 ³
Hodges Small Intrinsic Value (gross)	10.16	21.30	0.46	13.48	-18.44
Hodges Small Intrinsic Value (net)	8.76	19.76	-0.83	12.04	-0.30

Performance data quoted represents past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance of the fund may be lower or higher than the performance quoted. Performance data current to the most recent month end may be obtained by calling (866) 811 0224, or visiting www.hodgesfunds.com for quarterly performance. The fund imposes a 1.00% redemption fee on shares held less than 30 days. Performance data does not reflect the redemption fee. If reflected, total return would be reduced. Gross performance doesn't reflect fees or expenses; if reflected, returns would be reduced.

³Not a full calendar year. The inception date of the Small Intrinsic Value Fund was December 26, 2013.

Market Cap is the value of a company that is traded on the stock market, calculated by multiplying the total number of shares by the present share price. Price to Earnings (P/E) Ratio is calculated by dividing the price of a company's stock by its earnings per share. Price/Book is calculated by dividing the price of a company's stock by its book value. Price/Cash Flow is calculated by dividing the price of company's stock by its cash flow.

The fund's investment objectives, risks, charges and expenses must be considered carefully before investing. The prospectus contains this and other important information about the Hodges fund, and it may be obtained by calling (866) 811 0224, or visiting www.hodgesfunds.com. Read it carefully before investing.

Mutual fund investing involves risk. Principal loss is possible. The fund invests in smaller companies, which involves additional risks such as limited liquidity and greater volatility. The Fund invests in foreign securities which involves greater volatility and political, economic and currency risks and differences in accounting methods. These risks increase for emerging markets. The fund may also make short sales of securities, which involves the risk that losses may exceed the original amount invested. The fund may also use options and future contracts, which have the risks of unlimited losses of the underlying holdings due to unanticipated market movements and failure to correctly predict the direction of securities prices, interest rates and currency exchange rates. These risks may be greater than risks associated with more traditional investments. Value investing carries the risk that the market will not recognize a security's inherent value for a long time, or that a stock judged to be undervalued may actually be appropriately priced or overvalued.

Past performance is no guarantee of future results.
